13	1051mm	11570	3393
14	1129mm	12460	3654
15	1207mm	13350	3915

TIMELESS RADIATORS

OVERVIEW

The GOTHIC cast iron radiator is exclusive to Beaumont. This unique design was taken from the Victorian Gothic period and reflects the architectural influences of the famous Rugby School in Warwickshire.

The style works in period and contemporary properties. They have been installed in everything from converted life boat stations to Tudor manor houses.

The GOTHIC comes assembled in one height 663mm and has an exceptional heat output.

All Beaumont cast iron radiators are carefully hand built to your own required BTUs and fully assembled ready for plumbing into your new or existing pipework.

The GOTHIC can be finished in a variety of colours – metallic, Farrow & Ball range, RAL colours or primed for onsite painting.

Because each radiator section is specially hand cast there may be a slight variation in the length of each radiator once built (end bush to end bush), please allow for this in your pipework fitting. We recommend that the radiators are on site before pipe centres are fixed.

The maximum number of sections is 15 due to weight and length.
